

HEPA⁺ module specifications

Productname: HEPA 400 - AIR300

Product information

The HEPA⁺ filter module is an absolute filter that blocks all particles up to a size of 0,3 µm. Smoke, pollen, dust, but also bacteria's, yeast and fungi are removed from the air.

Smaller particles such as viruses can potentially go through the HEPA⁺ filter, but the majority get stuck in between the special fibers of the HEPA⁺ filter.

Technical specifications

No	Item	Specification
1	Name	HEPA ⁺ & Active carbon Filter module Air 300
2	Article number	2.25.3050
3	HEPA filter grade	H13 >99,75% particle reduction
4	Particle size reduction	Particle size < 0.3~0.5 µm
5	Dimensions (L x W x D)	371 x 292 x 60 mm
6	Weight (Kg)	1.1
7	Surface area filter (m ²)	2
8	Average filter life	Pending on air quality, indicative: 3 - 6 months
9	Filter material	Water repellent
10	Pressure loss (Pa)	≤ 140 Mpa
11	Packaging	1 filter per individual packing
12	Storage conditions	Dry storage (RH ≤ 90% / temp max: 60°C)
