
From September 2020 ALL Scotsman EC and MXG Series ice makers will be factory fitted with the new XSafe sanitation system as standard.

XSafe XSafe is the 'new normal' for safe, hygienic ice production. The high power UV system operates 24 hours a day, 7 days a week **destroying 99%** of all known bacteria and viruses (included Corona-Viruses) and reduces the development of moulds, yeasts, slime, and odours prolonging the operational life of your ice machine.
